

# Full Bleed 2" Artboard Template Guides

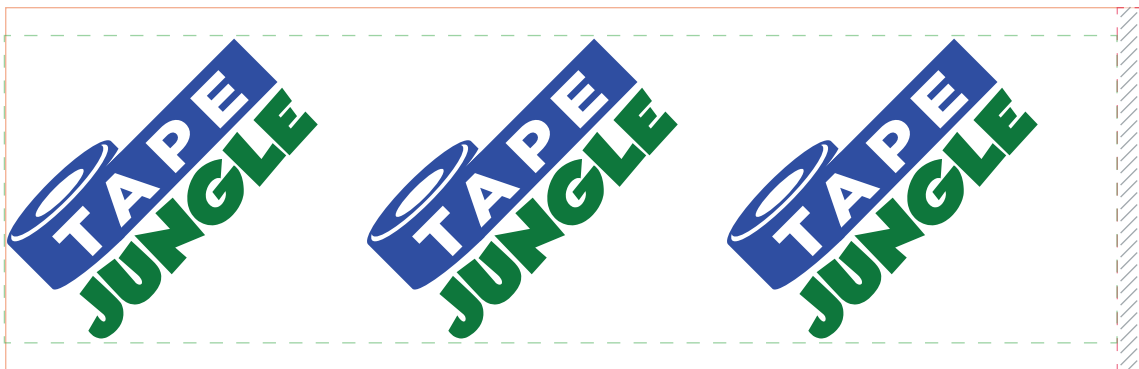

- 1** Paste your artwork into a new layer. You can rotate, step&repeat your logo within the safe area.
- 2** Be sure to convert your fonts into outlines and save your file (To do this go to Type > Create Outlines).
- 3** Now you are ready to upload your logo or email it to later! We'll send you a proof within the next day.

Embedded raster images must be 300 dpi or higher for best print quality. Gradients will be converted to bitmap halftones and identify all Pantone colors within your logo.

Example of **Print-Ready-Artwork** imposed 3-up on 5.92" Template Guide. Artwork starts at the leading edge of tape and will repeat at the end of gap interval.

Select the most suitable template guide and save it as a single page PDF file or AI file.
