Technical Data Sheet

P621 Blue Painter's Masking Tape

Product Description:

This product is a high performance masking tape for general industrial, construction and do-it-yourself use. The acrylic adhesive system will not dry out and lose holding power and the product will cleanly remove from most surfaces for up to 21 days. The P621 product works on drywall, glass, hardwood floors, wood trim, and a variety of other surfaces. The most typical use is paint and window masking. Application of the product and preparation and nature of the substrate are factors which will affect the product performance. The end user must determine its suitability for use.

Product Properties / Characteristics:

Nominal Results

Adhesion to Steel: PSTC I (oz/in)	19.0 to 22.0
Tack Level:	High
Tensile Strength: PSTC 31 lb/sq in	20
Elongation (%): PSTC 31	9 %
Thickness: PSTC 33	5.7 mils (nominal)

The values listed above are averages determined by standard production testing procedures. The suitability for use shall be determined by the user for the particular application.

Limitations of Warranty: Alanson Products and seller warrants to customers that coated products constructed and delivered by Alanson Products and seller to be free of defects in workmanship and to meet the specifications published by Alanson Products which are available upon request. For a period of six (6) months from date of delivery and in the event of Alanson Products brand product proved to be defective, the excluding solution, at Alanson Product's option, shall be a) refund the purchase price b) repair or c) replace the defective product. No acceptance or responsibility for loss, or expense, implied or otherwise, shall be assumed by seller or manufacturer. User assumes all risk and liability in connection herewith.

This stated Warranty & Limitation of Liability can only be changed through a written agreement by an authorized officer of Alanson Products.
